

Built in America.

Designed for FEOC and BABA compliance.
Built to Deliver Safer Energy Storage and
Stronger Financial Returns. **Today.**

WHAT IS FEOC? Foreign Entity of Concern (FEOC)

The Inflation Reduction Act (IRA) includes rules that restrict clean energy projects from relying on materials, components, or supply chains connected to designated Foreign Entities of Concern.

Projects that fail FEOC requirements may lose eligibility for valuable federal tax incentives.

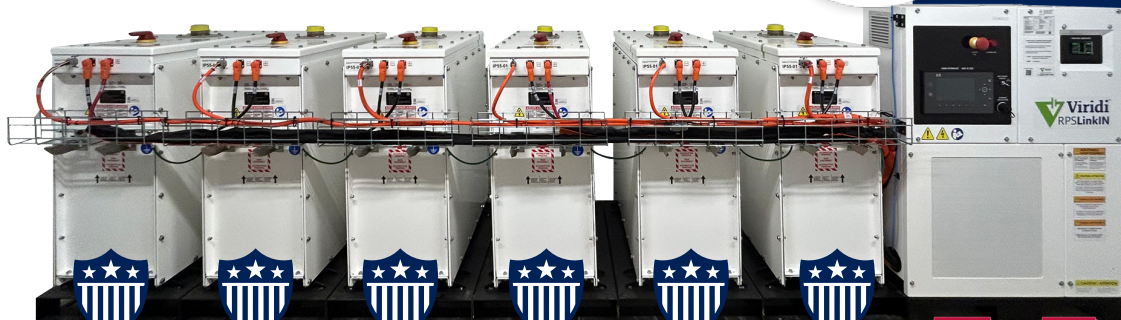

- ★ Qualify For Incentives
- ★ Avoid Compliance Risk
- ★ Win Government-Funded Projects
- ★ Reduce Supply-Chain Uncertainty
- ★ Future-Proof Investments

WHAT IS BABA? Build America, Buy America (BABA)

BABA requires federally funded infrastructure projects to use U.S.-made iron, steel, manufactured products, and construction materials whenever applicable.

Many public-sector, infrastructure, and government-supported projects now require domestic sourcing.

U.S.-Made & Traceable

FEOC Ready

BABA Aligned

Protect Tax Credits

Reduce Risk

Accelerate ROI

WHY VIRIDI STANDS APART

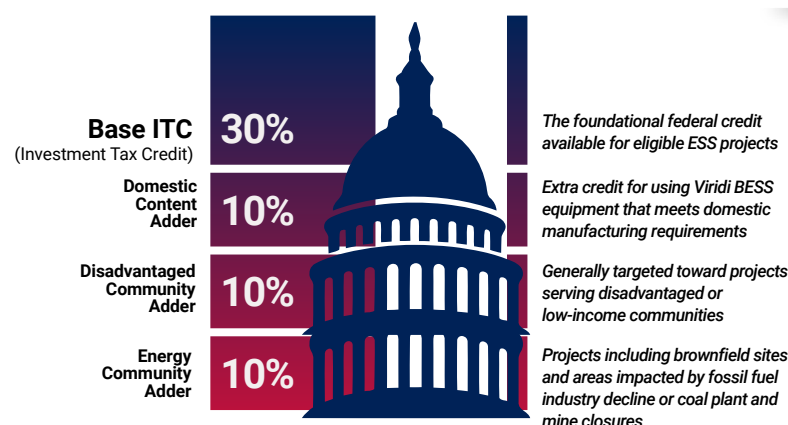

Built for Compliance.
Built for Confidence.

Unlike competitors that rely on overseas components, Viridi manufactures battery energy storage systems in the United States and maintains a fully traceable supply chain.

“Built in the U.S. with a fully traceable, FEOC-compliant supply chain, Viridi helps customers secure incentives while delivering trusted zero-emissions power.”— Jon M. Williams, CEO

\$TACK YOUR SAVINGS

UP TO **60%**
TOTAL RECOVERY

By meeting all criteria, you maximize your financial advantage & equipment cost recovery

**Safer Energy Storage.
Stronger Financial Returns.**
