

Viridi at a Glance

Viridi's 42-acre campus home was built in 1923 for General Motors.

Powering the Green Economy with Innovation

At Viridi, we are more than just a company – we are catalysts for change. Our mission is to build up communities and drive the transition to a green economy through groundbreaking technology.

We believe in an inclusive and sustainable future, where no one is left behind. That's why we are committed to supporting all income levels and ensuring that everyone can thrive in the advancements of technology and the shift towards a greener world. To bring this vision to life, we have created **GreenForce**, a job-opportunity agency that recruits and trains workers for Viridi. With GreenForce, we help people attain, navigate, and sustain successful careers in the green energy future.

GREEN FORCE

Revolutionizing Energy Storage with Failsafe Battery Technology

Viridi is at the forefront of advancing failsafe battery technology, revolutionizing energy storage. Our battery energy storage systems (BESSs) are built on a modular basis, providing failsafe and reliable power for a wide range of applications.

Our fail-safe battery systems are designed to redefine energy storage and power the transition to renewable energy. Whether for industrial, medical, commercial, municipal, or residential buildings, Viridi systems deliver on-demand and affordable power. What sets us apart is our ability to safely install and operate our products in nearly any environment or location, meeting rigorous safety standards.

Our Comprehensive Total Solution

- **RPS50 Energy Storage System (50kWh)**
- **RPS150 Mobile Energy Storage System (150kWh)**
- **1.2 MWh Container-Based Storage System (1.2 MWh)**
- **Vcom Premium Edge Computing Platform**
- **faveo Intelligent Traffic Backup System**

At Viridi, we are committed to transforming the energy landscape and creating a sustainable future for all. Join us on this exciting journey towards a greener and more innovative world.
